Purwakarta, Indonesia

## PROFILE

---

A Full Stack Web Developer with more than 1 year of experience, specialized in building responsive and user-friendly websites. Deeply interested in software development, especially in the field of Full Stack Web Development, as well as a great interest in Artificial Intelligence (AI). Eager to continue developing expertise in this field of technology and contribute to innovative projects.

## SKILLS

---

- **Programming Language:** JavaScript, PHP, TypeScript
- **Framework & Library:** React, Node.js, Laravel, Next.js, Tailwind CSS, Bootstrap, Alpine.js
- **Database:** MySQL, SQLite
- **Tools & Technology:** Git, Nginx, Linux
- **Web Development:** HTML, CSS, RESTful APIs
- **Design & Prototyping:** Figma
- **Languages:** Indonesian, English

## WORK EXPERIENCE

---

### PT. Pratama Solusi Teknologi – Internship Web Developer | October - December 2023

- Created a company profile website with various features, including login, news, contact, order, and dashboard.
- Developed a visually appealing and user-friendly user interface.
- Completed development and testing of features to ensure smooth functionality.

## PROJECTS

---

- **List of Lit**

A book search application that utilizes the Google Books API to display a list of books based on user searches. Users can search for books easily and get information related to the book.

**Tech Stack:** React, Tailwind CSS, Google Books API

[Demo](#)

- **MyCoffee**

A coffee ordering application that allows users to view a list of coffee menus, place orders, and access various information such as news, contacts, and dashboards. This project was created as part of an internship assignment.

**Tech Stack:** CodeIgniter 4, Bootstrap

[GitHub](#)

- **Ruang Baca**

A library application that allows users to view a list of books available for borrowing. For admins or officers, this application makes it easier to manage data on books, students, borrowing, and returning books. The main goal is to make it easier for library staff to manage data, as well as help students find books that can be borrowed.

**Tech Stack:** Laravel, Tailwind CSS, Alpine.js
